CARBON REDUCTION PLAN GUIDANCE

Notes for Completion

Where an In-Scope Organisation has determined that the measure applies to the procurement, suppliers wishing to bid for that contract are required at the selection stage to submit a Carbon Reduction Plan which details their organisational carbon footprint and confirms their commitment to achieving Net Zero by 2050.

Carbon Reduction Plans are to be completed by the bidding supplier¹ and must meet the reporting requirements set out in supporting guidance, and include the supplier's current carbon footprint and its commitment to reducing emissions to achieve Net Zero emissions by 2050.

The CRP should be specific to the bidding entity, or, provided certain criteria are met, may cover the bidding entity and its parent organisation. In order to ensure the CRP remains relevant, a Carbon Reduction Plan covering the bidding entity and its parent organisation is only permissible where the detailed requirements of the CRP are met in full, as set out in the Technical Standard² and Guidance³, and all of the following criteria are met:

- The bidding entity is wholly owned by the parent;
- The commitment to achieving net zero by 2050 for UK operations is set out in the CRP for the parent and is supported and adopted by the bidding entity, demonstrated by the inclusion in the CRP of a statement that this will apply to the bidding entity;
- The environmental measures set out are stated to be able to be applied by the bidding entity when performing the relevant contract; and
- The CRP is published on the bidding entity's website.

Bidding entities must take steps to ensure they have their own CRP as soon as reasonably practicable and should note that the ability to rely on a parent organisation's Carbon Reduction Plan may only be a temporary measure under this selection criterion.

The Carbon Reduction Plan should be updated regularly (at least annually) and published and clearly signposted on the supplier's UK website. It should be approved by a director (or equivalent senior leadership) within the supplier's organisation to demonstrate a clear commitment to emissions reduction at the highest level. Suppliers may wish to adopt the key objectives of the Carbon Reduction Plan within their strategic plans.

A template for the Carbon Reduction Plan is set out below. Please complete and publish your Carbon Reduction Plan in accordance with the reporting standard published alongside this PPN.

¹Bidding supplier or 'bidding entity' means the organisation with whom the contracting authority will enter into a contract if it is successful.

Carbon Reduction Plan

Supplier name: Demant (Parent), Diatec Diagnostics (Bidding Entity)

Publication date:

Commitment to achieving Net Zero

Demant is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2019	
Additional Details relating to the Baseline Emissions calculations. 2019 is our baseline year. Demant joined the Science Based Targets initiative in 2021, committing to set targets in line with what climate science deems necessary to limit global warming to 1.5°C. SBTi guidelines prescribe that the Demant Group must reduce our own direct and indirect emissions (scope 1,2 and 3) by 46.2% by 2030 with 2019 as baseline.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	11,206
Scope 2	20,774
Scope 3 (Included Sources)	355,211
Total Emissions	387,191

Current Emissions Reporting

Reporting Year: 2024 (market based)	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	14,645
Scope 2	14,781
Scope 3 (Included Sources)	464,103
Total Emissions	493,529

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 209,083 CO₂e by 2030 using 2019 as a baseline. This is a reduction of 46%.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2019 baseline. The carbon emission reduction schemes equate to an increase of 106,338 tCO₂e against the 2019 baseline, a 21%ge increase against the 2019 baseline. There is an increase due to an increase in business and covid fall out. The measures that will be in effect when performing the contract are:

- Interacoustics continuation of ISO 14001 environmental standard certification
- Scopes 1,2 and 3 approved by SBTi
- Road map to net zero
- Road map to 100% renewable electricity
- Annual Sustainability Report
- 100% FSC or recycled cardboard
- 100% recycled plastic packaging tape

In the future we hope to implement further measures such as:

- Continuation of ISO 14001 certification
- Open projects for the reduction of packaging
- Move to electric vehicles by 2030
- Move towards renewable energy
- Reduce waste in operations
- Increase circularity of products

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁴ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁵.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁶.

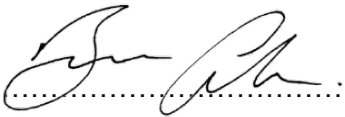

⁴<https://ghgprotocol.org/corporate-standard>

⁵<https://www.gov.uk/government/collections/government-conversion-factors-for-company-reporting>

⁶<https://ghgprotocol.org/standards/scope-3-standard>

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
